

49th Plumbing and Sanitary Equipment Expo 2017 Booth Overview

ASAHI AV booth was set up at the 49th Plumbing and Sanitary Equipment Expo 2017 that was held at Tokyo Big Sight from August 1 (Tue) to 3 (Thu) in JAPAN.

Visitors to the booth were shown major products being disassembled and/or assembled, solvent Taper Socket joining/cementing, Polypropylene "PP" welding, piping maintenance service demonstrations and new products introduction.

Exhibition Booth

The booth featured products that visitors could "look, touch and try using" as a way of providing hints and tips to resolve issues that customers have with the manufacturing equipment and facilities.

<Demonstrations>

- Disassembly and/or Assembly
- Taper Socket joining/cementing
- Polypropylene "PP" welding
- Piping Maintenance

<New products>

- Mixer (Time Difference type Mixer, Ejector, and Slit Mixer)

The mixers are space-efficient and do not require power to deduce mixing fluctuations in the direction of flow. Size: 15 mm - 200 mm

- Emergency shut-off (or open) Valve (Ball Valve or Butterfly Valve)

Uses a spring return to operate the valve with spring force, even during emergency situations where there is a loss of power, to completely shut-off (or open) flow. Size: 15 mm - 100 mm

- Picoball

Compactness and lightweight electric valves have been achieved in these automatically valve actuators. All thermoplastic body and actuator housing allow to excellent corrosion resistance.

Size: 1/4inch, 3/8inch, 1/2inch, 10 mm, 13 mm, 15 mm

- Diablock (Isobutylene-Isoprene Rubber "IIR-C" Gasket)

IIR-C AV-Packing newly developed for sodium hypochlorite piping gasket.

Size: 13 mm - 350 mm (for JIS10K Flange)
